

# CLOTH ENVELOPES

## Anatomy of a Cloth Envelope

The cloth envelope is a unique mailer. It's shape is the same as any ordinary envelope and it works in the same manner but that's where the similarities end. Made of 100% cotton, the fabric is specially precessed so that it can be folded and glued to form the envelope. It has the touch and feel of cloth but with the functionality of the common envelope. The multitude of beautiful prints available make them stand out from your ordinary mail.

Stamps adhere to the specially processed fabric. Post Office. approved.

Apply your mailing label here. Address labels with super adhesive work the best.

A peel and stick strip is placed on the flap of the envelope for quick and easy sealing.
