## In-Depth Reporting Capabilities

### *World Wide Inventory & Transaction Visibility*

#### Key Capabilities of the Our WMS Allow You to:

- Access to 100% of your inventory through your browser
- Place and/or import orders in the Customer Portal
- Pre-notify MSI of an inbound shipment via the Customer Portal
- Be automatically notified via e-mail alerts of receipts, shipments and low inventory levels
- Automate your order flow with advanced EDI and shopping cart integrations
- Have real-time report access to run reports 24/7 and export to PDF, Excel or CSV formats

### *Remote Access to and Control of Key Inventory Processes*

#### Manage and Control Your Inventory

- Web-based order entry from anywhere in the world allows order shipment requests to be immediately entered into the system
- Select specific Lot Numbers and/or Serial numbers for shipment
- See the same information as MSI warehouse employees to help prioritize warehouse operations
- Always know what is happening with your inventory while in the warehouse or in transit
- RMA, Return Material Authorization

### *Advanced Functions Allow for Industry-Leading Accuracy*

#### A More Accurate Supply Solution

- Record inventory and sales events at the time of the transaction
- Enables faster Order-to-Cash cycle
- Captures billing information at the time of the transaction for greater accuracy.
- Eliminate data entry errors with:
- Web-based order entry option
- Barcode scanning
- EDI integration for order requests and shipping details

#### Barcode Scanning

- Lot Number
- Serial Number
- Expiration Date tracking

#### EDI Integration Ready

- 6 Standard File Formats
- Retailer-Compliant UCC-128 Label Printing
- Electronic Data Interchange
